

BEAUTY IN STRENGTH

EVERYDAY BATHS, SHOWERS
& TUB-SHOWERS

BETTER STARTS NOW WITH ACRYLX™

Beauty can be graceful and delicate. It can also be quite powerful. Day after day, our experts put their skills and knowledge to use developing ways to make products as unmatched in strength as they are in style.

AcrylX™, Applied Acrylic offers a high gloss, truer white finish. The finish material is less porous which creates an easier to clean surface. The high luster and longer lasting finish means a factory new look years after installation.

Aquatic's Everyday baths are reinforced, which turns layers of material into a solid structure that withstands pressure, impact and abuse like never before. What does mean for you? Quite simply, a better bath — one that sure to be as brilliant after years of daily use as it was on the day it was made.

On cover: 6636SMIN and 14834STT

BRIGHT, GLOSSY FINISH

As a complement to other bath fixtures, the Aquatic White finish is nothing short of inspiring. And that's just one of many bright possibilities:

Standard color

SUPERCORE™

The innovation built into the Everyday Series is just the beginning of what's possible when you choose Aquatic. For demanding applications requiring ultimate strength and resilience, Aquatic bath products reinforced with SuperCore™ are available.

- Same Aquatic White finish
- Same protective layers of resin and fiberglass
- Ultra-strong honeycomb reinforcement

Ask an Aquatic distributor for details.

EXCEPTIONAL CRAFTSMANSHIP, BACKED BY SOLID EXPERTISE AND SUPPORT

The beauty of Aquatic's Everyday bathware runs deep. Below the glossy AcrylX™ surface of every product are thousands of small fiberglass strands that are tightly interlocked and bonded to provide structure and rigidity. Adding to the exceptional durability of each product is Aquatic's renowned support.

Made in America

All Aquatic products are made by American workers in U.S. factories, using an unparalleled process that melds precision engineering with expert craftsmanship.

Aquatic also gives you the advantage of localized support. From our Customer Service Center in Arlington, Texas, and our multiple manufacturing and distribution facilities across the country, we'll work with you to help get your project off to a beautiful start.

Strong fleet of delivery vehicles

Aquatic is the only company in the industry to maintain a proprietary system for the nationwide distribution of products. No matter what your location, we can deliver your purchase in a professional and timely manner.

Leadership in environmental responsibility

Our nationwide network of factories and distribution facilities keeps our products close to your project site, allowing us to avoid the fuel waste of across-country shipping. Aquatic has also made a \$20-million investment in pollution-control technology to preserve the integrity of the end product, while helping protect the environment.

Robust warranty coverage

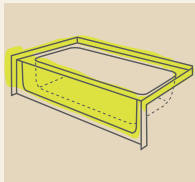

We're so confident in the quality of our products, we've backed AcrylX™ with an unprecedented lifetime limited warranty.

BATHTUBS

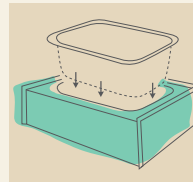

We built a better bathtub from the bottom up with a pre-leveled base system* and internal layers of reinforcement. The superior construction of our bathtubs is strengthened by the flexibility of a wide array of size, style, hydrotherapy and color options.

Flexibility in installation

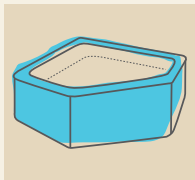

With an abundance of designs available, the type of bathtub you choose depends on your space and decorating scheme:

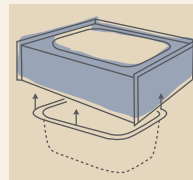

Skirted tubs have one finished side and are designed for installation in a recess or alcove. The visible finished side, also called a skirt or an apron, can be flat or bowed.

Drop-in tubs have no finished sides and are usually installed within a constructed deck and surround. A self-rimming edge can be seen above the mounting surface.

Corner tubs have triangular-shaped designs that fit into the nook of a room. These units are often configured for two-person bathing.

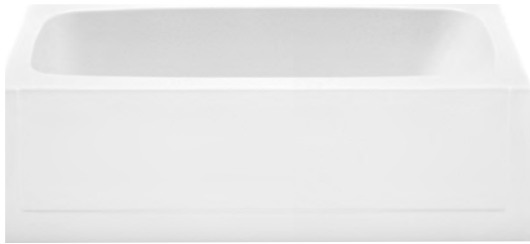

Undermount units are similar to a drop-in style and are equally versatile. Similar to an undermount sink, the bath is installed beneath a cutout in the mounting surface, and there is no visible edge.

Soothing powers of hydrotherapy

Bathtubs are not only built to last, but they're also engineered to soothe. Hydrotherapy systems are available on many models to suit most budgets. You can opt for the simplicity of soaking in a deep-well tub, or choose a whirlpool system with four or six jets for a targeted massage.

TUB-SHOWERS

Tub-shower units combine the advantages of beauty, durability and easy maintenance in your choice of versatile designs.

Enjoy the combined strengths of both tub and shower

Tub-shower units allow you to save space without compromising style. Aquatic also offers tub-and-shower "suites," which position the shower alongside a bathtub. For added flexibility, the bath can be ordered as a whirlpool.

Extra protection for added peace of mind

The strong foundation of Aquatic tub-showers is reinforced with structural enhancements and safety features, including top-to-bottom sideboards and pre-leveled bases*.

All products are shipped with protective skirt packaging on company-owned trucks. Our drivers handle each product with exceptional care, from our loading docks all the way to your project site.

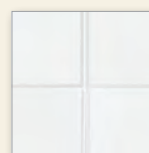

Features that transform even the smallest space into an inviting oasis

An inspiring array of hydrotherapy options and convenience features enhances the bathing experience:

- Soaking tubs allow you to immerse yourself in relaxation, while whirlpool tubs target tired or sore muscles.
- Molded toiletry shelves add to the built-in strength and utility of each unit.
- Choice of wall finishes, including smooth wall, smooth tile, diagonal tile, textured tile, and new subway tile, helps you create the perfect look.

Diagonal Tile

Smooth Tile

Textured Tile

Subway Tile

Compared to ceramic or glass subway tile, one-piece construction has many advantages, particularly when it comes to versatility and value:

- Timeless style blends in with almost any décor; offers a neutral backdrop for accent pieces and decorative accessories.
- Significantly less expensive than traditional applications.
- No adhesives, grout or caulk needed for installation.
- One-piece design easily wipes clean, and no tiles means no grout buildup to scrub and remove.

SHOWERS

The versatility of our shower selections is simply inspiring, with a wide variety of sizes available, from 32" to 60". When it comes to style, you'll find an array of tile-pattern and smooth wall finishes, as well as options for accessorizing with shower doors.

Enduring in appearance and construction

Like all Aquatic products, showers offer an unparalleled blend of quality, aesthetics and value that's supported by some of the most robust features in the industry:

- Full-length sideboards help protect each shower from damage, while providing a solid surface for installation of shower doors.
- Pre-leveled shower bases vastly simplify installation and allow for proper water drainage.

Features that enhance the shower experience

Highly functional features make showering extra comfortable and convenient:

- Low front thresholds can enhance safety and mobility.
- Integral soap shelves offer everyday practicality in a design that's durable and easy to clean.

Note: shown with optional designer grab bars.

Shower door options

Our focus on high quality and design extends to the finishing touches. Aquatic is part of the American Bath Group of companies, and as such, we benefit from an expansive offering of shower doors provided by other brands under ABG's umbrella. Look for these door recommendations on our website.

What makes an Aquatic bath great? It's more of a question of 'who?'

Behind every product is an expert—an engineer, a designer, a machine operator—someone who is passionate about making bathing a comfortable and enjoyable experience for everyone.

So when you choose Aquatic, you're choosing more than a shower, tub or other bath product.

You're choosing people who are the best at their craft. And that means you can relax knowing you're getting the best quality, value and options for your specific project.
